Class: 8 _____

The **Process Journal** is designed to track your progress and reactions throughout your work on the Design Cycle. You should record what you have done each lesson and what you will do next session. Take photographs of your project as it is being built to show each step of production. Indicate problems you have encountered and how you overcome them.

Date	What was achieved today? What problems did you have? How did you solve them?	What will you do next lesson? What tools or materials will you need?
